

From my perspective giving LPFM priority will be detrimental. I travel constantly for business and rely on being able to hear K-Love where ever I go to keep informed on key issues and activities. It is key for advertising as well. If people cannot find preferred stations they will stop listening to radio and simply use Cd's, etc. That will negatively affect business nationwide. Good stations should be rewarded and allowed to expand their markets versus having the government come in and close the doors on the business.
